

ABDUL HAQ A. AYANTAYO

(313)-230-8612 | hm2269@wayne.edu | [linkedin.com/in/abdul-haq-ayantayo/](https://www.linkedin.com/in/abdul-haq-ayantayo/) | github.com/AyanT01

EDUCATION

Wayne State University, Detroit, MI

Expected Graduation: May 2027

*Bachelor of Science in **Computer Science***, GPA: 3.89

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management, Machine Learning, Parallel Computing, Computer Architecture, Linear Algebra, Probability and Statistics, Computer Vision

SKILLS

Languages: Python, C++, Java, Kotlin, Go, Typescript, MySQL, Bash, HTML/CSS

Libraries and Frameworks: Tensorflow, Pandas, Scikit-learn, OpenCV, Django, Flask, NodeJS, Pytest, Selenium

Tools and Technologies: Git, AWS, Docker, MongoDB, Azure, Jupyter Notebooks, Kaggle, Visual Studio Code

WORK EXPERIENCE

Software Engineer Intern, Amazon, Seattle, WA

June 2025 - Sep 2025

- Developed a new recommendations dataset leveraging store specific purchase data rather than global purchase trends, reducing bias and improving the visibility of newer products
- Improved click through rate (CTR) by 5% and cart conversion rate (CCR) by 10%, generating significant revenue gains and boosting visibility for new products
- Designed and executed an A/B testing strategy, then successfully launched the new recommendations dataset worldwide across 3 regions and 9+ countries

Machine Learning Engineer Intern, Apple, Seattle, WA

April 2025 - June 2025

- Built an intelligent assistant using Retrieval-Augmented Generation (RAG) to support users of On-Device ML internal tools, reducing average response time from 2 hours to under 15 seconds
- Developed an end-to-end evaluation pipeline using state-of-the-art automated and human-eval metrics to benchmark performance, ensure response quality, and identify key areas for improvement
- Integrated AlignScore-based factuality checks and automated content ingestion to ensure accurate and up-to-date responses

Software Engineer Intern, Hubspot, Remote

Jan 2025 - April 2025

- Developed and deployed recommendation features that optimize advertising workflows and help users identify improvements to maximize their ad effectiveness
- Improved reliability by implementing automated request body logging for high-traffic endpoints (handling over 10 million daily calls), making issue triage more efficient

AI Researcher, Oakland University, Rochester, MI

May 2024 - Aug 2024

- Engineered a comprehensive dataset of 400+ deep learning models from Kaggle, synthetically injected four types of training bugs to simulate real-world scenarios for AI research
- Proposed and developed models utilizing LSTM, CNN, and Transformer architectures to significantly enhance bug detection accuracy in deep learning programs, resulting in a significant increase in developer and compute efficiency

Research Intern, University of Tennessee, Chattanooga, TN

May 2023 – July 2023

- Developed algorithms for diverse hand gestures to address biomechatronic challenges through reinforcement learning, leveraging Python libraries like TensorFlow and Keras and evaluated their efficiency using Tensorboard
- Utilized Python within the Myosuite platform, a tool developed by Meta, to conduct rigorous testing and algorithm refinement, resulting in a 15% increase in the effectiveness and responsiveness of custom models

PERSONAL PROJECTS

[Beyond Returns: The Sustainability Index](#) (Python, HTML/CSS, ReactJS, News API, Git)

- Led a team of 4 to build a platform that visualizes stock picks from the S&P 500 through the lens of sustainability, and built an interactive user interface using ReactJS
- Utilized Python to extract stock-related news from data sources and applied a sentiment analyzer to assess polarity
- Conducted ROI and volatility analyses for stocks, leveraging Pandas to evaluate investment potential, contributing to securing 2nd place in the Schonfeld Sustainability Challenge at ShellHacks, Florida's largest hackathon event

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

President, National Society of Black Engineers, Detroit, MI

August 2024 - Present

Affiliations: ColorStack, Code2040, CodePath, Management Leadership for Tomorrow (MLT), Brilliant Black Minds, Wayne State AI/ML
